

## Oshkosh 1988 Pedal AT-6 / SNJ / Harvard

The AT6 / SNJ / HARVARD was a very popular military trainer. The round engine, exhaust stack, wheel covers, air scoop, gear door, and the flexible windshield give this toy distinct North American features. Fuselage and wings are constructed from 3/8" plywood and the engine cowl of 3/4" pine which is glued and turned to shape. The adjustable pedal crank-shaft assembly allows for a growing pilot and the joystick turns the plane by linkage to the tailwheel. Decal sets are available for the Air Force AT6 or Navy SNJ. Also available are Harvard / Wirraway decals for the Australian, British, Canadian and New Zealand Air Forces.

Your 3 to 7 year old can achieve new heights of fun with this pedal plane.

A Plans set with step by step instructions is available. They include full size patterns for all wood, sheetmetal parts, and dimension drawings for the steel fabricated parts. A parts list is also included. Kit order forms are also included for those who would like to have parts prebuilt and ready for assembly. A hardware and wheels kit is also available to help the builder, all the hardware items required to build one AT6/SNJ Pedal plane are included.
