

Oshkosh 1986 Pedal Eagle

PEDAL EAGLE has proven to be one of the most popular models. The classic bi-plane design with a four color decal set giving it a universal eye appeal. The wheels pants are fabricated from 3/4" pine which is glued and sanded to shape. The fuselage and wings are built from 3/8" plywood. The adjustable pedal crank assembly provides two positions allowing for a growing pilot. Steering is done from a joystick that is linked to a tail wheel assembly. An aircraft instrument decal installed on the panel gives the Pedal Eagle a finishing touch. This pedal plane is very similar to the Pedal Pitts.

This project gives your 3 to 7 year old child a great start in aviation.

A Plans set with step by step instructions is available. They include full size patterns for all wood , sheetmetal parts, and dimension drawings for the steel fabricated parts. A parts list is also included. Kit order forms are also included for those who would like to have parts prebuilt and ready for assembly. A hardware and wheels kit is also available to help the builder ,all the hardware items required to build one Eagle Pedal plane are included.
