

Oshkosh 1989 Pedal Jet “Topcat”

The TOP CAT is patterned after the F14 Tom Cat of Top Gun fame. The wing was swept back to act as an out-rigger. This model incorporates a unique nose wheel steering connected to the joystick. Fuselage and wings are constructed from 3/8” plywood. The windshild is made of a flexible material. Adjustable relay rods permit the pedal system to grow with the child. Top Cat’s decal set includes Air Force, Marine and Navy markings plus a full color instrument panel.

This project gives any 3 to 7 year old top gun great fun.

A Plans set with step by step instructions is available. They include full size patterns for all wood, sheetmetal parts, and dimension drawings for the steel fabricated parts. A parts list is also included. Kit order forms are also included for those who would like to have parts prebuilt and ready for assembly. A hardware and wheels kit is also available to help the builder, all the hardware items required to build one TopCat Pedal plane are included.
